

Airship Solutions **E13**

Product Information Sheet

Airship Solutions E13 is the world's smallest commercial outdoor high performance airship. The airship effortlessly flies in winds of 10 knots and excites crowds as it gracefully maneuvers overhead. **The E13 is the perfect outdoor trainer, or cost effective advertising vehicle.**

	INDOOR	OUTDOOR
Engine Type	2 x Speed 350	Brushless Midi-Fan
Fin Type	Rear thruster	Elevators/Rudders
Recommended Battery/Fuel	2S1P 3700mAh	4S1P 3700mAh
Endurance	2 hours	30 minutes in light winds
Payload	900 grams/ 30 ounces	234 grams / 8 ounces
Cubic Volume	4m ³	4m ³
Total Advertising Area	12m ²	12m ²

Transport

The E13 has been designed to fit into a suitcase when deflated. The ability to pack small makes it simple for transportation on aircraft, or the back of a car when being used in different cities.

Battery Options

Batteries can be modified on the E13 to increase payload, or endurance. The flight endurance is determined by the throttle management of the operator.

Outdoor Flying 4S1P – 2400mAh, 4S1P – 3700 mAh, 4S2P 5000mAh
5S1P – 2400mAh, 5S1P – 3700mAh, 5S2P 5000mAh

Indoor Flying uses Lithium Polymer batteries, with 2400mAh – 10,000 mAh

Advertising Options

The E13 has four advertising options available, these are

- › Digital Printing, or Painting the Polyurethane hull
- › Vinyl graphics
- › A printed outer Ripstop Hull
- › Side banners

Options

- › Internal Lights for night flying
- › Camera for still photographs
- › Release Mechanism/Coupon drop
- › Video for in flight blimp cam
